AMMAR AL-HARDAN

FULL-STACK SOFTWARE ENGINEER

ammarhardann@gmail.com | +974 513707 17 | Doha - Qatar | linkedin

PROFESSIONAL SUMMARY

Software Engineer with 5 years of experience delivering enterprise and government web applications, specialized in Angular, TypeScript, scalable frontend architecture, REST API integration, and workflow-driven systems. Hands-on full-stack development
experience using Angular and .NET, with exposure across the SDLC from development and testing through deployment and production
support. Strong at translating complex business requirements into maintainable, production-ready solutions.

CORE TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript (ES6+), React, HTML5, CSS3, SCSS, Tailwind CSS
Angular: RxJS, Component-Based Architecture, Reusable Components, Lazy Loading, State Management, SSR, Performance Optimization
Backend: .NET, RESTful APIs, JSON, Authentication & Authorization, API Integration
Engineering: Git, GitHub, Agile/Scrum, CI/CD, Code Review, Debugging & Troubleshooting, SDLC

Experience

Mid-Level Frontend Software Engineer

Public Prosecution — Doha, Qatar | Nov 2025 – Present

- Develop and maintain large-scale government digital platforms supporting critical business operations and thousands of users.
- Build workflow-driven solutions covering document generation, approvals, digital signatures, case management, and administrative operations.
- Design reusable Angular components and shared UI patterns to improve consistency, maintainability, and delivery speed.
- Integrate frontend applications with RESTful APIs and optimize API-driven workflows, responsiveness, and user experience.
- Contribute to architecture decisions, code reviews, debugging, and frontend engineering standards within Agile teams.
- Collaborate with backend engineers, business analysts, QA, and stakeholders to turn business requirements into production-ready features.

Frontend Developer

iHorizons — Doha, Qatar | May 2022 – Oct 2025

- Developed and maintained enterprise web applications for regional government and media clients using Angular and TypeScript.
- Built responsive, interactive interfaces and reusable frontend features integrated with RESTful APIs.
- Translated business requirements and UI/UX designs into production-ready applications while maintaining code quality.
- Improved application performance, load speed, and SEO through SSR, lazy loading, and frontend optimization.
- Worked closely with backend developers and cross-functional teams within Agile/Scrum environments.

Full-Stack Developer
Orange Jordan — Amman, Jordan | Oct 2021 – Apr 2022

- Developed full-stack web applications using Angular, TypeScript, and .NET.
- Implemented frontend features and integrated them with backend APIs and business logic.
- Participated across the SDLC, including development, testing, deployment, and production support.
- Collaborated with designers, backend developers, and project managers to deliver maintainable solutions.
- Contributed to troubleshooting, performance improvements, and production support.

FULL-STACK CAPABILITIES

- **API-driven applications:** Angular clients consuming RESTful .NET APIs with authentication and authorization flows.
- **Enterprise UI:** reusable components, complex forms, workflow screens, tables, dialogs, and business rules.
- **Security:** JWT authentication concepts, protected routes/endpoints, role-based authorization, and secure password handling.
- **Data layer:** hands-on learning and project work with Entity Framework Core, DbContext, LINQ, migrations, CRUD, and relational data modeling.

Education

Bachelor's Degree in Computer Information Systems (CIS)
Zarqa University, Jordan | 2017 – 2021
Relevant focus: Software Development, Database Systems, Web Technologies, System Analysis.
