ABOUT ME

Frontend Software Engineer with 4+ years of experience developing large-scale government and enterprise applications. Specialized in Angular, TypeScript, and modern frontend architecture, with hands-on experience building complex workflows, document management systems, approval processes, and business-critical platforms. Strong focus on performance, scalability, maintainability, and delivering high-quality user experiences within agile development environments.

EDUCATION

Bachelor's Degree in Computer Information Systems (CIS)

Zarqa University, Jordan | 2017 – 2021

Relevant Focus: Software Development, Database Systems, Web Technologies, System Analysis

WORK EXPERIENCE

Public Prosecution (Doha, Qatar)

Mid-Level Frontend Software Engineer | Nov 2025 – Present

- Develop and maintain large-scale government digital platforms serving thousands of users across critical business operations.
- Design and implement complex workflow-driven systems, including document generation, approval processes, digital signatures, and case management solutions.
- Build scalable and reusable Angular components, improving development efficiency and consistency across multiple modules.
- Optimize application performance, API integration, and state management to enhance responsiveness and user experience.
- Collaborate closely with backend engineers, business analysts, and stakeholders to deliver secure and compliant government solutions.
- Contribute to system architecture decisions, code reviews, and frontend best practices to ensure maintainability and scalability.

iHorizons (Doha, Qatar)

Frontend Developer | May 2022 – Oct 2025

- Developed and maintained enterprise web applications for major regional clients, including media and government organizations.
- Built responsive and interactive user interfaces using Angular, TypeScript, and RESTful APIs.
- Transformed business requirements and UI/UX designs into production-ready applications.
- Improved application performance, SEO, and load speed through SSR, lazy loading, and frontend optimization techniques.

- Participated in the full Software Development Life Cycle (SDLC), including development, testing, deployment, and production support.
- Worked within Agile teams, collaborating with designers, backend developers, and project managers to deliver high-quality solutions.

Orange Jordan (Amman, Jordan)

Full Stack Developer | Oct 2021 – Apr 2022

- Developed full-stack web applications using Angular, TypeScript, and .NET.
 - Designed and implemented frontend features while integrating backend APIs and business logic.
 - Collaborated with cross-functional teams to deliver scalable and maintainable solutions.
 - Optimized application performance and enhanced user experience through modern web development practices.
 - Contributed throughout the Software Development Life Cycle (SDLC), including development, testing, deployment, and support.
-

TECHNICAL SKILLS

Frontend Development

- Angular (2+)
- TypeScript
- JavaScript (ES6+)
- React
- HTML5
- CSS3 / SCSS
- Tailwind CSS

Architecture & State Management

- Angular Architecture
- RxJS
- Component-Based Design
- Reusable UI Development

APIs & Integration

- RESTful APIs
- JSON
- Authentication & Authorization Integration

Performance & Optimization

- Server-Side Rendering (SSR)
- SEO Optimization
- Performance Optimization
- Lazy Loading
- Bundle Optimization

Backend Development

- Php

Tools & Practices

- Git & GitHub
 - Agile/Scrum
 - CI/CD
 - Code Review
 - Debugging & Troubleshooting
-

LANGUAGES

- Arabic – Native
- English – Professional Working Proficiency
